

INVESTIGATION TECHNIQUES

SEC007

COURSE DESCRIPTION

Investigation involves a series of planned activities to uncover information about a crime or determine causes of incident. The purpose is to identify, gather and preserve evidence, as well as to search for witnesses. The investigation concentrates on gathering factual information about the details that led to the accident. If investigations are conducted properly, there is the added benefit of uncovering problems that did not directly lead to the accident. This information benefits the ongoing effort of reducing the likelihood of accidents. As problems are revealed during the investigation, action items and improvement; that can prevent similar accidents from happening in the future will be easier to identify than at any time.

COURSE GOAL

This course will provide the knowledge, practical skills, and tools to conduct accident and incident investigations.

COURSE OBJECTIVES

By the end of this course, the participant will be able to:

- Determine needs and responsibilities for investigation.
